SUMMARY

Smart contract auditing
- *Auditor on code4rena & Sherlock with over 100+ submissions, including 4 high severity findings and 20 medium severity findings.*
- *Ranked 1st for QA report for several audit contests*
- *Ranked top 100 in total awards for 2022*

Cyber Security
- *I've discovered security vulnerabilities like XSS, SQL injection, Business Logic, domain takeover, and information disclosure in major companies like Sony, AT&T, and finance-related platforms through bug bounty programs on HackerOne and Bugcrowd. My work helps improve cybersecurity by identifying and reporting critical weaknesses before they can be exploited.*
